Question 01

- Primary Actor: Customer
- Scope: Online shopping system
- Stakeholders:
    - ✓ customer
    - ✓ system owner
    - ✓ supplier
    - ✓ service provider
        - payment gate way provider
        - customer supporter
        - Regulatory authorities-how system operates or handles customer data.
- Preconditions:
    - First the customer must have a registered account in the online shopping system.
    - Customer logged in.
    - The customer must have selected a product they wish to purchase.
    - The customer must have a valid payment method.

- Success Guarantee:
    - The order is successfully placed in the system.
    - The customer receives a tracking number and estimated delivery date.
    - The payment is processed successfully.
    - customer should receive a confirmation mail with all the important information.

- Main Success Scenario:

    - The customer logs in to their account on the online shopping system.

- The customer browses and selects the desired product.
- The system displays the product details, including the price and availability.
- The customer adds the product to their cart and proceeds to checkout.
- The system displays the order summary, including the total cost and shipping address.
- The customer confirms the order details and selects the payment method.
- The system redirects the customer to the payment gateway to complete the payment process.
- The payment gateway processes the payment and sends a confirmation to the system.
- The system generates a tracking number and estimated delivery date for the order.
- The system sends a confirmation email to the customer with the order details, tracking number, and estimated delivery date.

- Extensions:

  <u>Assuming</u>

  - If the product is out of stock, the system notifies the customer and suggests alternative products. The customer can choose to select an alternative product or cancel the order.
  - If the payment is declined, the system prompts the customer to provide a valid payment method. The customer can choose to provide a valid payment method or cancel the order.
  - If there is a delay in delivery, the system updates the estimated delivery date and notifies the customer.
